\*Include Photo of Dead tree

## ***(Section below to be filled out by Certified Arborists)***

Measures used: Rubber Mallet\_\_\_\_, Binoculars\_\_\_\_, Probe rod\_\_\_\_, Trowel\_\_\_\_ Visual confirmation\_\_\_\_

CRZ= critical root zone

Dead by: Disease \_\_\_\_\_ Root Rot\_\_\_\_\_ Lightning\_\_\_\_\_ Pests\_\_\_\_\_ Unknown\_\_\_\_\_

Estimated Number of 6ft tall Trees and Canopy Size Potential for No Net Loss:

Large\_\_\_\_\_ Medium\_\_\_\_\_ Small\_\_\_\_\_ Very Small\_\_\_\_\_

Arborist signature: \_\_\_\_\_ Date\_\_\_\_\_

Certification #\_\_\_\_\_ Phone#\_\_\_\_\_

## **Arborists Disclosure Statement:**

Arborists are tree specialists who use their education, knowledge, training, and experience to examine trees, recommend measures to enhance the beauty and health of trees, and attempt to reduce the risk of living near trees. Owner may choose to accept or disregard the recommendations of the arborist, or to seek additional advice. Arborists cannot detect or anticipate every condition or event that could possibly lead to the structural failure of a tree, or guarantee that a tree will be healthy or safe under all circumstances. Trees and other plant life are living, changing organisms affected by several factors beyond our control. Trees can be managed but not controlled. To live near trees is to accept some degree of risk. The only way to eliminate all risk associated with trees is to eliminate the trees.
