Please submit the original signed version of this form (no scans or faxes are accepted). The purpose of this request is to allow the installer to check out all installed electrical systems and equipment for proper and safe operation per its listing and to allow the HVAC system to be tested, balanced and checked for proper and safe operation per its listing prior to final inspections. Only after the contractor demonstrates that all of these requirements have been met will a written release for the electrical service be provided to Georgia Power. The owner or contractor must make application with Georgia Power in order for the service to be made. Georgia Power will not set the meter if their specific requirements have not been met.

This form does not allow for the occupancy or use of the building without the issuance of a certificate of occupancy. The approval for temporary power can and will be revoked if abused or life safety issues become apparent. This is a temporary power release for a period of 30 days. Only the Building Official can provide an extension.

Before this permit is approved, an inspection must be performed by the City's Design, Environment, and Construction Department to confirm that the following have been completed:

1. All electrical service and control equipment is set, wired, fused, bonded and grounded.
2. All wall and ceiling coverings have been installed.
3. The required disconnects are in place and operational
4. All outlet devices and switches are connected or made safe.
5. The electrical system is ready for connection to public utilities.
