INTRODUCTION

These Applications for Annexation, Rezoning, Conditional Use Permit and Lot Consolidation (collectively “Applications”) are submitted for three parcels totaling 1.09 acres located in Land Lots 5 & 51 of the 18th District of Dekalb County, Georgia known as 1119, 1121, and 1123 Clairmont Road (“Property”). The Property is shown on the survey prepared by metro Engineering & Surveying Co., Inc. dated January 08, 2018 and filed with this Application.

The Property is currently in both unincorporated Dekalb County and City of Decatur and zoned Dekalb County OI and R-75, land use TC, and City of Decatur R-60, land use RL. The Applicant, Emory Heights, LLC, (“Applicant”), now seeks approval to annex the unincorporated parcels into the City of Decatur, amend the land use to C, rezone the Property to OSI, obtain a conditional use permit to permit an office use and consolidate all three lots for better access and parking to service the Property. This document is submitted as the project summary and application response.

DESCRIPTION OF THE PROPERTY AND SURROUNDING AREA

The Property fronts on Clairmont Road, and is on the corner of Clairmont Road and Clairmont Run. There is an existing single family residential structure on the City of Decatur parcel (1119 Clairmont) but it is unoccupied. 1121 Clairmont is a small triangular parcel with no street access. 1123 Clairmont also a single family residential structure that has been converted and is currently being used as an office. Nearby properties are zoned Dekalb County OI, MR-2 and OD and City of Decatur I, RS-17 and R-60.

PROJECT SUMMARY

As shown on the conceptual site plan prepared by filed with this application (the “Site Plan”), Applicant proposes to develop the Property as an office campus. All three parcels would be consolidated to allow for connection between the sites and surface parking behind the existing structures. The existing structures would not be enlarged and no significant work will be done to the exterior of the building. 1119 Clairmont would be converted to extend the Humanly operation that is currently existing at 1123 Clairmont. Humanly is a private office and co-working space specifically for mental health therapists and other wellness professionals. There are two locations in the greater Atlanta area including the one currently in existence at 1123 Clairmont. 1119 Clairmont would carry the same look and feel as the adjacent 1123 Clairmont building. Both buildings will be quiet, professional office space which will fit well with and add to the surrounding community.

APPLICANT RESPONSE STATEMENT: REZONING AND LAND USE AMENDMENT

The Applicant provides the following information in response to the required analysis:

1. *How would the uses permitted under the proposed land use category be suitable in view of the use and development of adjacent and nearby property?*

The adjacent and nearby properties have land use designations of office, industrial or medium density. The requested land use is compatible with the current uses on the properties and fits well with the surrounding land uses.

2. *What adverse effects does the proposed amendment have on the existing use or usability of adjacent or nearby property?*

The proposed amendment will not have any adverse effects on the existing use or usability of adjacent or nearby property.

3. *To what extent will the proposed amendment result in uses which will or could cause an excessive or burdensome use of existing streets, transportation facilities, utilities or schools?*

The proposed amendment will not cause an excessive or burdensome use of existing streets, transportation facilities, utilities or schools. 1123 is already being used as office space and the use across the street is used as a gym facility, so the existing streets and facilities will be able to support the proposed use since it is less intensive or as intensive as many of the existing uses.

4. *Are there other existing or changing conditions affecting the use and development of the property which, because of their impact on the public health, safety, morality and general welfare of the community, give supporting grounds for either approval or disapproval of the proposed amendment?*

Ideally these properties are combined to create a campus where mental health and wellness practitioners can serve their clients. This will be of great value to the community, especially given the current focus on mental health and wellness. This amendment is needed to achieve this goal because currently these are three separate parcels, in two different jurisdictions with three different land use and zoning designations. This proposal will allow for all of the parcels to be combined and have the same land use and zoning and will also allow for access and parking across the two buildings.

APPLICANT RESPONSE STATEMENT: CONDITIONAL USE PERMIT

1. How would the proposed use be suitable in view of the use and development of adjacent and nearby property?

The adjacent and nearby properties have office, industrial and medium density residential uses. The requested office use is compatible with the current uses on the properties and fits well with the surrounding properties. The existing buildings will not be expanded and the parking will be reconstructed to allow for better internal flow and accommodate more off street parking.

2. How is the proposed use consistent with the existing zoning requirements?

A companion rezoning application to PO has been submitted along with this conditional use application. The proposed use is allowed and consistent with the PO zoning and will meet all of the requirements of the PO zoning.

3. What adverse effects does the proposed use have on the existing use or usability of adjacent or nearby property?

The proposed amendment will not have any adverse effects on the existing use or usability of adjacent or nearby property.

4. To what extent will or could the proposed use cause an excessive or burdensome use of existing streets, transportation facilities, utilities or schools?

The proposed amendment will not cause an excessive or burdensome use of existing streets, transportation facilities, utilities or schools. 1123 is already being used as office space and the use across the street is used as a gym facility, so the existing streets and facilities will be able to support the proposed use since it is less intensive or as intensive and many of the existing uses.

5. Describe how the proposed ingress and egress to the subject property is adequate. Include an evaluation of the traffic impact of the proposed use relative to street capacity and safety of public street and nearby pedestrian uses?

There will be one point of ingress and one point of egress for the entire site which will help with internal traffic flow and avoid any issues on the surrounding streets. This use should not overflow the existing street capacity at all.

6. What impact will the proposed use have on established property values and on the public health, safety, morality, comfort and general welfare of the residents of the City?

Ideally these properties are combined to create a campus where mental health and wellness practitioners can serve their clients. This will be of great value to the community, especially given

the current focus on mental health and wellness. The conditional use permit is needed to achieve this goal because it a requirement for the use under the PO zoning district.

CONSTITUTIONAL OBJECTIONS

The Applicant respectfully submits that the Unified Development Ordinance of the City of Decatur, Georgia, as amended from time to time and known as the “UDO” to the extent that it classifies the Property in any zoning district that would preclude development of a medical office, is unconstitutional as a taking of property, a denial of equal protection, an arbitrary and capricious act, and an unlawful delegation of authority under the specific constitutional provisions later set forth herein. Any existing inconsistent zoning of the Property pursuant to the UDO deprives the Applicant and Property owner of any alternative reasonable use and development of the Property. Additionally, all other zoning classifications, including ones intervening between the existing classification and that requested herein, would deprive the Applicant and Property owner of any reasonable use and development of the Property. Further, any attempt by the City Commission to impose greater restrictions upon the manner in which the Property will be developed than presently exist would be equally unlawful.

Accordingly, Applicant submits that the current zoning classifications and any other zoning of the Property save for what has been requested as established in the UDO constitute an arbitrary and unreasonable use of the zoning and police powers because they bear no substantial relationship to the public health, safety, morality or general welfare of the public and substantially harm the Applicant and Property owner. All inconsistent zoning classifications between the existing zoning and the zoning requested hereunder would constitute an arbitrary and unreasonable use of the zoning and police powers because they bear or would bear no substantial relationship to the public health, safety, morality or general welfare of the public and would substantially harm the Applicant and Property owner. Further, the existing inconsistent zoning classification constitutes, and all zoning and plan classifications intervening between the existing inconsistent zoning classification and that required to develop this Project would constitute, a taking of the owner’s private property without just compensation and without due process in violation of the Fifth Amendment and Fourteenth Amendment of the Constitution of the United States, and Article I, Section I, Paragraph I and Article I, Section III, Paragraph I of the Constitution of the State of Georgia and the Due Process and Equal Protection Clauses of the Fourteenth Amendment to the Constitution of the United States.

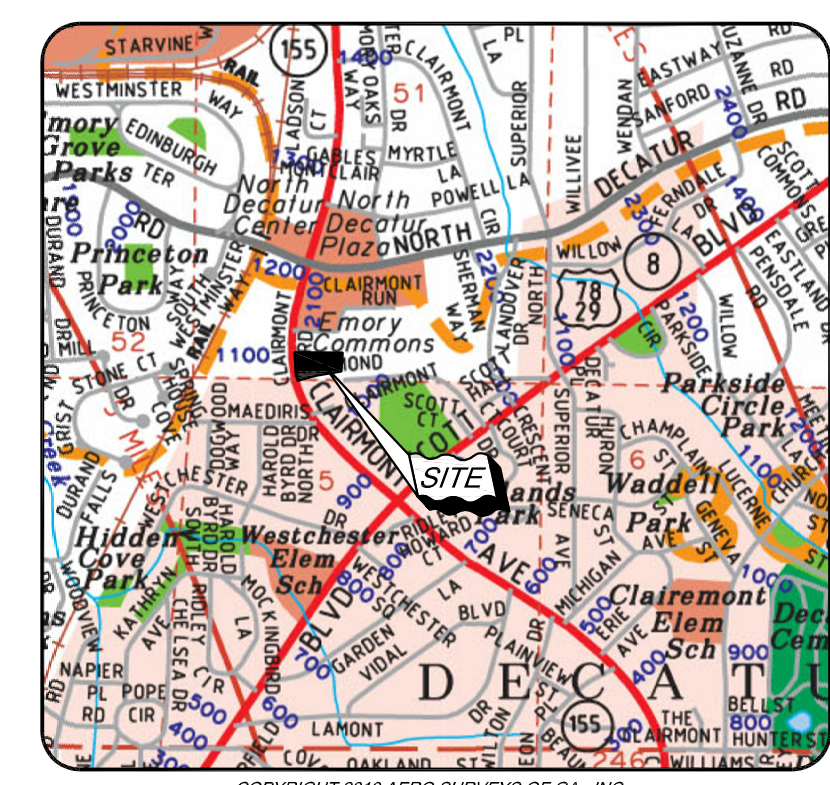

Further, the Applicant respectfully submits that failure to approve the requested zoning change would be unconstitutional and would discriminate in an arbitrary, capricious and unreasonable manner between the Applicant and Property owner and owners of similarly situated property in violation of Article I, Section III, Paragraph I of the Constitution of the State of Georgia and the Equal Protection Clause of the Fourteenth Amendment of the Constitution of the United States.

Finally, the Applicant respectfully submits that the City Commission cannot lawfully impose more restrictive standards upon the development of the Property than presently exist, as to do so not only would constitute a taking of the Property as set forth above, but also would amount

to an unlawful delegation of their authority, in response to neighborhood opposition, in violation of Article IX, Section IV, Paragraph II of the Georgia Constitution.

This Application meets favorably the prescribed test set out by the Georgia Supreme Court to be used in establishing the constitutional balance between private property rights and zoning and planning as an expression of the government's police power. See Guhl vs. Holcomb Bridge Road Corp., 238 Ga. 322 (1977).
