(a) Proposers shall inform themselves of all conditions under which the work is to be performed, concerning the site of the work, the structure of the ground, the obstacles which may be encountered, whether shown in the Contract Specifications or not, and all other relevant matters concerning the work to be performed.

A Contractor to whom a contract is awarded will not be allowed any extra compensation by reason of any such matters or things concerning which the Contractor did not inform himself prior to proposing. The successful Contractor must employ, as far as possible, such methods and means in the carrying out of this work as will not cause any interruption or interference with any other Contractors.

(b) Proposers must satisfy themselves by personal examination of the locations of the proposed work and by such other means as they may prefer locations of the proposed work and by such other means as they may prefer as to the correctness of any quantities listed in the proposal, and shall not, after submission of their proposal, dispute or complain of such estimate nor assert that there was any misunderstanding in regard to the nature or amount of work to be done.

2. INTERPRETATION OF CONTRACT DOCUMENTS

If any person contemplating submitting a proposal on this project is in doubt as to the true meaning of any part of the Contract Specifications or other Sections of the Contract Documents, he may submit to the Owner a written request for an interpretation thereof. The person submitting the request will be responsible for its prompt delivery. Any interpretation of the Contract Documents including the Contract Specifications will be made only by addendum duly issued or delivered by the Owner to each person receiving a set of such documents. The Owner will not be responsible for any other explanations or interpretations of the Contract Documents including the Contract Specifications.

3. APPROXIMATE QUANTITIES

On all items on which proposals are to be received on a unit price basis the quantities stated in the Proposal will not be used in establishing final payment due the Contractor. The quantities stated on which unit prices are so invited, are approximate only, and each proposer shall make his own estimate from the Contract Specifications of the quantities required on each item and calculate his unit price proposal for each item accordingly. Proposals will be compared on the basis of number of units stated in the Proposing Schedule set forth in the Proposal. Payment on the contract on unit price items will be based on the actual number of units installed on the completed work. Lump Sum proposal items shall be supported by a Schedule of Values as established in the Contract Specifications.

5. QUALIFICATION OF PROPOSERS

It is the intention of the Owner to award a contract only to a proposer who furnishes satisfactory evidence that he has the requisite experience and ability and that he has sufficient capital, facilities and plant to enable him to prosecute the work successfully and promptly, and to complete the work within the time named in the Contract Documents.

To determine the degree of responsibility to be credited to a proposer, the Owner will weigh any evidence that the proposer or personnel guaranteed to be employed in responsible charge of the work has or has not performed satisfactorily on other contracts of like nature and magnitude or comparable difficulty at similar rates of progress.

6. DISQUALIFICATION OF PROPOSERS

More than one proposal for the work described in this Document, to be included under a Contract, from an individual, firm or partnership, a corporation or an association under the same or different names, will not be considered. Reasonable grounds for believing that any proposer is interested in more than one proposal for the work contemplated will cause the rejection of all proposals in which such proposer is interested. If there are reasonable grounds for believing that collusion exists among the proposers, the proposals of the participants in such collusion will not be considered.

7. AGREEMENT, BONDS, INSURANCE

The attention of proposers is specifically directed to the forms of agreement and bonds to be executed and types of insurance to be taken out in the event a contract award is made.

8. FAILURE TO EXECUTE AGREEMENT AND FILE REQUIRED BONDS AND INSURANCE

Failure of a successful proposer to execute the agreement and file required bonds and insurance within the required time shall be just cause for the annulment of the award. On failure of a successful proposer to execute the agreement and file the required bonds and insurance within the required time, he shall forfeit his proposal security as agreed as liquidated damages, and the proposer, by filing a proposal, agrees to this proviso. Upon annulment of an award as aforesaid, the Owner may then award a contract to the next lowest responsible proposer.

The Contractor shall submit copies of its subcontractors' insurance certificates to the Owner and Engineer as evidence of such insurance coverage. The Contractor acknowledges and agrees that each subcontractor performing work for this Contract will meet these minimum insurance requirements and that any costs or uninsured events arising from or involving a subcontractor working on behalf of the Contractor for this Contract is the sole

Each of said policies of insurance shall provide coverage in the following minimum amounts: Commercial general liability insurance with a minimum combined bodily injury and property damage limit of One Million Dollars (\$1,000,000) per occurrence, a personal and advertising injury limit of One Million Dollars (\$1,000,000), a products-completed operations aggregate limit of Two Million Dollars (2,000,000) and a general aggregate limit of Two Million Dollars (\$2,000,000) per location.

7. SAFETY

In accordance with generally accepted construction practice, the Contractor will be solely and completely responsible for conditions of the job site, including safety of all persons and property during performance of the work. This requirement will apply continuously and not be limited to normal working hours.

The duty of the Engineer to conduct construction review of the Contractor's performance is not intended to include review of the adequacy of the Contractor's safety measures, in, on, or near the construction site.

8. LAWS TO BE OBSERVED

The Contractor shall keep himself fully informed of all existing and future Federal, State, County, and municipal laws, ordinances and regulations which in any manner affect those engaged or employed in the work or the materials used in the work or the conduct of the work or the rights, duties, powers or obligations of the Owner or of the Contractor or which otherwise affect the Contract, and of all orders and decrees of bodies or tribunals having any jurisdiction or authority over the same. He shall at all times observe and comply with, and shall cause all his agents, sub-contractors and employees to observe and comply with, all such laws, ordinances, regulations, orders and decrees; and shall protect and indemnify the Owner, the Engineer and all of their officers, agents and employees, against any claim, loss or liability arising or resulting from or based upon the violation of any such laws, ordinance, regulation, order or decree, whether by himself or by his agents, sub-contractors or employees. If any discrepancy or inconsistency is discovered in the plans, Contract Drawings, Contract Specifications or other Contract Documents for the work in relation to such laws, ordinance, regulation, orders or decree, the Contractor shall forthwith report the same to the Engineer.

9. PROVISIONS OF LAW

It is specifically provided that this Contract is subject to all applicable laws and that the rules of law shall prevail over any provision contained in any of the Contract Documents which may be in conflict thereto or inconsistent therewith.

10. SUBCONTRACTORS

The Contractor shall notify the Owner in writing of the names of all Subcontractors he proposes to employ on the Contract and shall not employ any Subcontractors until the Owner's approval in writing covering such Subcontractors has been obtained.

The Contractor agrees to be fully and directly responsible to the Owner for all acts and omissions of his Subcontractors and of any other person employed directly or indirectly by the Contractor or Subcontractors, and this contract obligation shall be in addition to the liability imposed by law upon the Contractor.

Nothing contained in the Contract Documents shall create any contractual relationship between any Subcontractor and the Owner. It shall be further understood that the Owner will have no direct relations with any Subcontractor. Any such necessary relations between Owner and Subcontractor shall be handled by the Contractor.

The Contractor agrees to bind every Subcontractor (and every Subcontractor of a Subcontractor, etc.) by all terms of the Contract Documents as far as applicable to the Subcontractors work unless specifically noted to the contrary in a subcontract approved in writing as adequate by the Owner.

Should any Subcontractor fail to perform in a satisfactory manner the work undertaken by him, such subcontract shall be terminated immediately by the Contractor upon notice from the Owner.

11. LICENSES, PERMITS, AND REGULATIONS

The Contractor shall secure all Federal, State and Local licenses required by law. He shall obtain and pay for all necessary permits. He shall give all notices and comply with all laws, ordinances and regulations bearing on the conduct of the work as drawn and specified. If the Contractor observes that the drawings or Contract Specifications are at variance therewith, he shall promptly notify the Engineer in writing, and any necessary changes shall be adjusted as provided in the Contract for changes in the work.

12. TAXES

Contractor shall, without additional expense to the Owner, pay all applicable Federal, State and local sales and other taxes, except taxes and assessments on the real property comprising the site of the project.

13. LOCATION OF EXISTING UTILITIES AND PIPING

The location of existing and underground utilities, such as gas mains, water mains, electric lines, etc., as shown on the Contract Drawings, have been taken from the record drawings of the parent utility companies where available. However, the Owner does not assume responsibility for the possibility that during construction utilities other than those shown may be encountered or that the actual location of those shown may be different from the locations designated on the Contract Drawings. At the locations wherein detailed positions of these facilities become necessary to the new construction, the contractor shall, at his own expense, furnish all labor and tools to either verify and substantiate the record drawing location or definitely establish the position of the facilities.

Because of the nature of the work, adjustments may be required in new construction to meet existing conditions. Such adjustments shall be made by the Contractor without additional cost to the Owner.

14. PROGRESS ESTIMATES AND PAYMENTS

No payments under this Contract will be made except upon the presentation of Periodical Estimate for Partial Payment prepared by the Contractor on forms, supplied by Owner, and approved in writing by the Engineer which shall show that the work covered by the payments has been done and the payments therefore are due in accordance with this Contract. Such Payment Forms shall be submitted to the Engineer on the 25th day of a calendar month to permit checking before the end of the calendar month.

Upon presentation of certified copies of purchase bills and freight bills the Owner will, unless specifically stated otherwise in the General Conditions of Contract, include in such monthly estimates payments for materials that will eventually be incorporated in the project, providing that such material is suitably stored on the site of the project, at the time of submission of the estimate for payment. At the time the next following monthly estimate is submitted, certified copies of receipted purchase and freight bills for the stored materials included in the previous monthly payment estimate shall be submitted. If the Contractor fails to submit proof of payment with the next monthly payment estimate, those items of stored materials for which no proof of payment has been submitted will be deleted from the current payment estimate. Such materials when so paid for by the Owner will become the property of the Owner and in case of default on the part of the Contractor the Owner may use or cause to be used by others these materials in construction of the project. However, the Contractor shall be responsible for safeguarding such materials against loss or damage of any nature whatsoever, and in case of any loss or damage the Contractor shall replace such lost or damaged materials at no cost to the Owner.

Except as otherwise provided in the immediately preceding paragraph, the first estimate shall be of the value of the work done and of materials proposed and suitable for permanent incorporation in the work, delivered and suitably and safely stored at the site of the work since the Contractor shall have begun the performance of this contract, and every subsequent estimate, except the final estimate, shall be of the value of the work done and materials delivered and suitably stored at the site of the work since the last preceding estimate was made; provided, however, that should the Contractor fail to adhere to the program of completion fixed in this Contract, the Engineer shall deduct from the next and all subsequent estimates the full calculated accruing amount of the liquidated damages (if any) to the date of said estimate, until such time as the compliance with the program has been restored; and provided, also that materials delivered to the site for which payment is included in the estimate shall not be removed from the site of the work prior to its completion without the written consent of the Engineer.

The estimates shall be signed by the Engineer and approved by the Owner, and after such approval the Owner, subject to the foregoing provisions, will pay or cause to be paid to the Contractor, in the manner provided by law, the estimated value of the work performed and of the value of the materials furnished and delivered and unused and suitably and safely stored at the site of the work, such materials to be those which are proposed and suitable for permanent incorporation in the work, less retainage of ten percent (10%).

When fifty percent (50%) of the contract value including change orders and other additions to the contract value provided for by the contract documents is due and the manner of completion of the contract work and its progress are reasonably satisfactory to the Engineer, the Owner shall withhold no more retainage. At the discretion of the Owner and with the approval of the Contractor, the retainage of each subcontractor may be released separately as the subcontractor completes his or her work.

If, after discontinuing the retention, the Engineer determines that the work is unsatisfactory or has fallen behind schedule, retention may be resumed at the previous level. If retention is resumed by an Owner, the contractor and subcontractors shall be entitled to resume withholding retainage accordingly.

At Substantial Completion of the work or such other standard of completion as may be provided in the contract documents and as Engineer determines the work to be reasonably satisfactory, the Owner shall, within 30 days after invoice and other appropriate documentation as may be required by the contract documents are provided, pay the retainage to the Contractor. If at that time there are any remaining incomplete minor items, an amount equal to 200 percent of the value of each item as determined by the Engineer shall be withheld until such item or items are completed. The reduced retainage shall be shared by the Contractor and subcontractors as their interests may appear.

15. CHANGE IN WORK, ALTERATIONS, OMISSIONS & EXTRA WORK

Owner reserves the right to increase or decrease the quantity of any item or portion of the work, or to omit portions of the work, as may be deemed necessary or advisable by the Owner, and, also, to make such alternations or deviations, additions to, or omissions from the work or the Contract Drawings and Specifications, as may be determined during progress of the work to be necessary or advisable for the proper completion thereof. Upon written order of the Owner, the Contractor shall proceed with the work as increased, decreased or altered.

The Engineer is authorized to order, on behalf of the Owner, minor changes in the work which do not involve extra cost to Owner and which do not change the character of the work; he is not authorized to order any other changes, alterations, omissions, additions, or extra work, unless the same are approved in a Contract Supplement properly authorized in writing by the governing unit of the Owner. No claim of Contractor for extra compensation because of any change, alteration, omission, addition or extra work will be paid or be payable unless a written order for such charge, alteration, omission, addition or extra work, is signed by the authorized representative of the Owner.

When any changes decrease the amount of work to be done, such changes shall not constitute a basis or reason for any claim by Contractor for extra compensation or damages on account of any anticipated profits which he thereby loses on the omitted work; and Contractor shall not be entitled to any compensation or damages therefor.
